

I spoke on 15<sup>th</sup> July to Ross Montague (07796 937359) who is responsible for Cameras and enforcement for the Northumberland Speed Safety Partnership

He has had the data from the speed camera survey and says that there is not really a speeding issue in Glanton and the village does not meet the criteria for siting a speed camera or for having a visiting speed van, and they would take no action based on this data.

He would probably not object to an engineering solution but felt that the request to put one in would have very low priority based on the survey. The relevant people in the Highways Department might be Jim Long or Sarah Hudson.
